EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Jondle on 11/18/03.

The application has been amended as follows:

In The Abstract:

The abstract on page 38 has been replaced with the following:

----The invention relates to an inbred corn line, designated KW7648, is disclosed. Inbred KW7648 is a Lancaster-Mol7 family based inbred that is specifically bred by a pedigree selection method for the north central United States. The invention also relates to the seeds of inbred corn line KW7648I, to the plants of inbred corn line KW7648 and to methods for producing a corn plant by crossing the inbred line KW7648 with itself or another corn line. The invention further relates to transgenic corn plants produced from inbred corn plant KW7648. ----

In The Claims:

In claim 2 and 6, "parts" has been replaced with ---a part----.

In claim 7, ---prepared--- has been inserted after "cells".

In claim 8, "A" has been replaced with ---The----.

Application/Control Number: 10/052,770

Art Unit: 1638

Claim 9 (Currently amended). A corn plant regenerated from the tissue culture of claim 7, wherein the regenerated plant has [is capable of expressing] all the morphological and physiological characteristics of inbred corn plant [line] KW7648, wherein a sample of seed of said inbred corn plant has been deposited under ATCC Accession No.

Claim 10 (Currently amended). A corn plant with all of the physiological and morphological characteristics of a plant of corn inbred KW7648, wherein said corn plant is produced by the [a] tissue culture of claim 8 [process using the corn plant of claim 6 as the starting material for such a process].

In claim 11, ---inbred--- has been inserted before "parent" in line 4.

Claims 34 and 35 have been cancelled.

Claim 36 (Currently amended). A method of producing a transgenic corn plant comprising transforming the corn plant of claim 2 with a transgene that [wherein the transgene] confers a characteristic selected from the group consisting of: herbicide resistance, insect resistance, resistance to bacterial disease, resistance to fungal disease, resistance to viral disease, and male sterility [and corn endosperm with improved nutritional quality].

Claim 48 (New claim). A method of introducing a desired trait into corn inbred line KW7648 comprising:

a) crossing KW7648 plants grown from seed deposited under ATCC Accession No. _____, with plants of another corn line that comprise a desired trait to produce F1

Application/Control Number: 10/052,770

Art Unit: 1638

progeny plants, wherein the desired trait is selected from male sterility, herbicide resistance, insect resistance, and resistance to bacterial, fungal or viral disease;

- (b) selecting F1 progeny plants that have the desired trait to produce selected F1 progeny plants;
- (c) crossing the selected progeny plants with KW7648 plants to produce backcross progeny plants;
- (d) selecting for backcross progeny plants that have the desired trait and physiological and morphological characteristics of corn inbred line KW7648 to produce selected backcross progeny plants; and
- (e) repeating steps (c) and (d) three or more times in succession to produce selected fourth or higher backcross progeny plants that comprise the desired trait and all of the physiological and morphological characteristics of corn inbred line MNI1 listed in Table 1 as determined at the 5% significance level when grown in the same environmental conditions.

Claim 49 (New claim). A plant produced by the method of claim 48, wherein the plant has the desired trait and all of the physiological and morphological characteristics of corn inbred line KW7648 listed in Table 1 as determined at the 5% significance level when grown in the same environmental conditions.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: for clarification, "a part thereof" in claims 2 and 6 is understood to mean the non-seed part of the plant.

Application/Control Number: 10/052,770

Art Unit: 1638

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

REQUIREMENT OF ALLOWANCE UNDER 37 CFR 1.801-1.809

The Deposit Statement in the amendment of 08/07/02 is deemed in accordance with 37 CFR 1.801-1.809. Since the application is otherwise in condition for allowance except for the needed deposit of seed, and since the Office has received written assurance that an acceptable deposit will be made on or before payment of the issue fee, the Office is authorized to mail Applicant a Notice of Allowance and Issue Fee Due together with a requirement that the needed deposit be made within THREE (3) MONTHS of the mail date of this letter (see 37 CFR 1.809(c)).

As set forth in 37 CFR 1.809(c), Applicant is required to deposit 2500 seeds of the claimed plant within THREE (3) MONTHS of the mail date of this letter; thus the time for making the deposit is on or before the payment of the issue fee. Although the time period for paying the issue fee cannot be extended, the time period for satisfying the deposit requirement may be extended under the provisions of 37 CFR 1.136. Failure to make the needed deposit of 2500 seeds will result in abandonment of the application for failure to prosecute.

Applicant is reminded that once the deposit of seed has been made, information regarding the date of deposit, description of the deposited material including number of seeds deposited, name and address of the depository, and the accession number must

be added to the specification in order to comply with 37 CFR 1.809(d). In addition, the claims must be amended to replace the blank "_____ " with the appropriate Accession Number. Amendments to the specification and the claims must be filed under 37 CFR 1.312. If these amendments are received after payment of the issue fee, these amendments must be accompanied by a petition and fee, and a showing of good and sufficient reasons why these amendments were not presented earlier.

Papers relating to this application may be submitted to Technology Sector 1 by facsimile transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242. All Technology Sector 1 fax machines are available to receive transmissions 24 hrs/day, 7 days/wk. Please note that the faxing of such papers must conform with the Notice published in the Official Gazette, 1096 OG 30. (November 15, 1989).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Medina A. Ibrahim whose telephone number is (703) 306-5822. The Examiner can normally be reached Monday -Thursday from 9:00AM to 6:00 P.M. and every other Friday from 9:00-5:30P.M.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Dr. Amy Nelson, can be reached at (703) 306-3218.

Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is (703) 308-0196.
